**GitHub:**

<https://github.com/jeremytuesley/>

**Technologies:** React, Javascript, Node.js, Typescript, Ruby, Ruby on Rails, GraphQL, Git, HTML, CSS

A dedicated, objective-driven developer, who after 6 years in administrative warehousing, decided on a career change into tech to pursue his true interests, starting with a bootcamp and self-study. I have a strong passion for learning, helping others in need and strive to deliver my best wherever I go. While I have a front-end bias, I welcome any opportunities to learn and further expand my skill set.

## Experience

---

### Freelance Developer [LinkedIn](#)

Jan 2021 - Present

- Side projects, XLExtends maintenance and on request additions
- Leetcode and assisting new learners via discord communities

### SignHow (RoR) [Website Link](#) - [Mobile View](#)

June 2022 - August 2023

Contract Full-stack Developer (Ruby on Rails)

- Developing pages based off Figma wireframes & creating reusable components
- Daily stand-ups/ progress reports
- Created reusable components and the API documentation to use them.
- Adjusted pre-existing pages to the MVC structure, refactoring into ERB.

## Projects - More shown on [Github](#) & [Portfolio](#)

---

### XLExtends (Commercial) [Website Link](#) - [GitHub Repository Link](#)

July 2021 - May 2022

Front End Developer (MERN)

- Designed and developed MERN stack shopfront website, with a booking, and payment system.
- Worked in a 3 person team, with my role managing sprints, developing the front-end side of the website using React, writing integration/ unit tests with Cypress, achieving 90%+ features tested.
- Managing sprints consisted of writing all user stories and then applying priority, estimated time taken and then assigning them to a sprint and developer.

### PC-Mart [Website Link](#) - [GitHub Repository Link](#)

May 2021

Two-sided Marketplace Web App (Ruby on Rails)

- Made this project because there's no real marketplace for used computer parts
- Full stack marketplace web application was built with Ruby on Rails for front-end and backend
- Currently has 15+ registered users, with a history of 30+ listings
- User authentication handled with Devise

## Education

---

### Academy of Information Technology

Feb 2021 - Aug 2021

Diploma of Information Technology

Graduated

Full-stack software engineer bootcamp program
