Skills: *React, Javascript, Node.js, Typescript*

Experience

Freelance Developer
Jan 2021 - Present

- Projects listed below
- Assisting new learners via discord communities
- Leetcodes and side-projects

Projects - More shown on portfolio

XLExtends *Website Link* - *GitHub Repository Link*
Front End Developer (MERN)
December 2021 - Mar 2022

- Designed and developed MERN stack shopfront website, with a booking, and payment system.
- Worked in a 3 person team, with my role managing sprints, developing the front-end side of the website using React, writing integration/ unit tests with Cypress, achieving 90%+ features tested.
- Managing sprints consisted of writing all user stories and then applying priority, estimated time taken and then assigning them to a sprint and developer.

Two-sided Marketplace Web App
May 2021

- Made this project because there's no real marketplace for used computer parts
- Full stack marketplace web application was built with Ruby on Rails for front-end and backend
- Currently has 15+ registered users, with a history of 30+ listings
- User authentication handled with Devise

StudyAssistant *GitHub Repository Link*
Ruby Terminal Application
April 2021

- Made this terminal application to assist me with revision studying
- Built application with Ruby, and utilized community based gems for writing tests, colorizing, and special effects
- CRUD of data was enabled through use of Ruby Gem for JSON
