Skills: *React, Javascript, Node.js, Typescript*

Experience

XLExtends
Front End Developer (MERN)

Brisbane, Australia
July 2021 - Present

- Designed and developed MERN stack shopfront website, with a booking, and payment system.
- Worked in a 3 person team, with my role managing sprints, developing the front-end side of the website using React, writing integration/ unit tests with Cypress, achieving 90%+ features tested.
- Managing sprints consisted of writing all user stories and then applying priority, estimated time taken and then assigning them to a sprint and developer.

Projects - More shown on portfolio

PC-Mart *https://https://pc-mart.herokuapp.com/ - https://github.com/jeremytuesley/PC-Mart*
Two-sided Marketplace Web App

May 2021

- Made this project because there's no real marketplace for used computer parts
- Full stack marketplace web application was built with Ruby on Rails for front-end and backend
- Currently has 15+ registered users, with a history of 30+ listings

Language & Technologies used:

- Front-end & Backend: Ruby/ Ruby on Rails
- Authentication: Devise

StudyAssistant *https://github.com/jeremytuesley/StudyAssistant*
Ruby Terminal Application

April 2021

- Made this terminal application to assist me with revision studying
- Built application with Ruby, and utilized community based gems for writing tests, colorizing, and special effects
- CRUD of data was enabled through use of JSON

Education

Australian Institute of Technology
Diploma of Information Technology
- *Full-stack software engineer bootcamp program*

Brisbane, Australia
Graduated 2021
